

SUSPENDED TOOL SHELF

FOR SCHACHT CRANBROOK LOOMS

FL5571
FL5572
FL5573

PARTS

left tool tray side
right tool tray side
tool tray
6X #10 x 1-3/4" Phillips truss head sheet
metal screws
2X 3/16" washers

TOOLS

#2 Phillips screwdriver

ASSEMBLY

1. Attach the tool tray sides to the tool tray: Slip each tray side into its appropriate dado groove, matching the "L" or "R" on each side to the "L" or "R" on the tray. Attach each side with two #10 x 1-3/4" Phillips truss head sheet metal screws. When assembled, the side of the tool tray that has the attached lip should slant downward, facing the front of the loom.
2. Attach the assembled tool tray to the inside of the loom: Align the tool tray so that the tray slants slightly downward—this way your tools will stay in the tray. Place a washer on each #10 x 1-3/4" Phillips truss head sheet metal screw and attach the tool tray to the loom with these screws. ■
